

## Nemera's Innovation Center reaches 100 employees

**PRESS RELEASE**  
La Verpillière, Jan 2019

Nemera's celebrated an important milestone: its Innovation Center has just hired its 100<sup>th</sup> employee.

*"There is no limit to Nemera's ambition to serve patients. We already market devices in over 40 countries for millions of users. We'll keep investing in new products and in state-of-the-art manufacturing equipment, to help even more patients with high quality drug delivery devices all over the world."*

Marc Haemel, CEO

### Nemera in figures:

- 4 plants in Europe and the USA

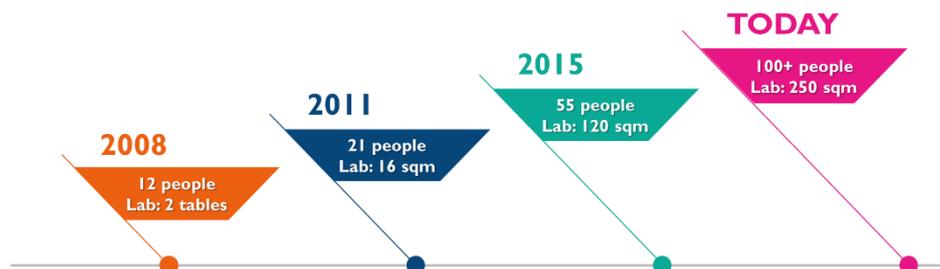

### Over:

- 1,900 employees

- 30,000 sq. meters of manufacturing clean rooms

- 100 engineers and experts working in Nemera's Innovation Center.

The Innovation Center, a multi-discipline drug delivery device development expertise center, was created in 2008. Early on, it included a few engineers, who worked on product development. Over the last 10 years, it has grown consistently to reach 100 employees and more than 250 m<sup>2</sup> of laboratory space.

*"Considering that our Innovation Center started with just 12 people, 10 years ago, hiring our 100<sup>th</sup> team member is a great achievement for us." says Innovation Director, Dimitri Grasswill. "We've grown a loyal client base and expanded our services, in order to answer to our customers' needs for device development. The patients' voice is the key driver of Nemera's product development. This growth is a result of taking care of customers, with a strong patient-focused commitment, a high level of creativity and passion every day in what we do. "*

The Innovation Center is composed of a passionate team which has the objective to address your development needs.

It has different teams which strives to develop the best devices for patients' health:

- Patient centricity & Usability
- Mechanical, electrical and material engineering
- Scientific computation
- Industrial property
- Program Management
- Performance testing
- Regulatory affairs
- Design for Manufacturing

### **Patient centricity**

As Nemera always puts patient first, technical expertise and patient usability always work hand-in-hand.

Along with the many fields of technological expertise, creative design and patient's usability assessment are central to product development. The Innovation Center carries real world evaluations, through impartial volunteers and collects user feedbacks.

Sophisticated technologies, like fast camera tracking, give engineers an inside view of the way the device is used, making it safe and accurate for the patient.

### **Proprietary devices and contract development**

The same quality-oriented process is applied to the development of proprietary devices, to customized solutions under contract with laboratories. The development quality team guarantees full compliance not only of the final device but of all the development chain. A strong program management ensures that the project is delivered on time and in full.
