

SENIOR TECH MANAGER

Your responsibilities :

- Controlling all projects and industrialisation activities in the plant: new projects and quotations, program management, development of new production equipment & facilities, and product life cycle management jointly with production.
- Promoting a positive and professional working atmosphere in the team and with all other plant departments.
- Developing people, and clarifying roles and responsibilities.
- Technology Department Employees Management.
- Validation of technical decisions/supplier selection, with the project team and central expert if required.
- Safety responsibility for all new equipment and building.
- Clarifying Roles and Responsibilities in ALL Projects.
- Coordinating on project level of all plant departments involved in projects for resource planning, and priorities set.
- Team Member of the Plant Steering Committee: consequently providing plant-wide initiatives and support.
- Department and Project budget.
- Development and Implementation of the technology strategy.
- Quotations, jointly with Sales and Finance (margin, assumptions, rentability simulations).
- Direct contact with customers, suppliers management, authorities, and global Nemera functions.

Expectations:

- Expert in Program Management and international contacts (customers, suppliers).
- Higher technical education.
- Experiences in a similar position for at least 5 years.
- Technical understanding of production equipment in the plastics industry (injection and assembly-decorating processes).
- Fluent English.
- Convincing personality and communication style.
- Natural Leadership Behaviour and Mindset.
- High commitment to reaching budget and project targets.
- Strategic thinking.
- Methodical and organised.
- High social competencies.
- Autonomous, reliable, loyal.

Nice to have:

- Experience in the medical devices/pharmacy/ automotive or related manufacturing industries with ISO standards.
- Experience with injection moulding processes and/or automatic production lines and/or construction of injection moulds.
- Experience in managing a project team.

We offer:

- Stable employment based on an employment contract.
- Life insurance.
- Medical care package.
- Sports card.
- Access to the language platform.
- The opportunity for development in an international company.
- Work in a dynamic work environment
- Integration event.
