

PRESS RELEASE

Lyon, France
January 19, 2026

As a world-leading drug delivery device solutions provider, our purpose of putting patients first enables us to design and manufacture devices that maximize treatment efficacy.

Nemera in figures:

- 7 plants worldwide
- Insight by Nemera with locations in Europe and North America
- Over:
- 3000 employees
- 30,000 sq. meters of manufacturing clean rooms
- 250 engineers and experts at Insight by Nemera

Nemera's multi-dose eyedropper for preservative-free formulations, Novelia®, approved with Haohai Qisheng for Dry Eye in China.

Shanghai HaoHai have launched their product, Lubricant eyedrops, Eyesucom® 隐形眼镜润眼液 with Novelia® 15mL dispenser, specifically designed to hydrate and lubricate the ocular surface, providing relief from discomfort and fatigue associated with contact lens wear.

Novelia® multi-dose closing tip system prevents bacterial contamination over the duration of treatment, eliminating the need for preservatives in the formulation.

This preservative-free approach is key to protecting the ocular surface in patients. Prolonged use of preserved eyedrops can cause allergic reactions, irritation and discomfort, and even damage to the eye. Novelia® provides patients with a preservative-free solution in the convenient format of a bottle.

"It's fantastic to see HaoHai bringing this new device to the market in China for the first time. We are proud to see Novelia®'s growing global reach to improve patients' lives. Managing contact lens discomfort effectively is key to many people's lifestyles. Therefore, our goal was to make eyedrop delivery as gentle and stress-free as possible. A formulation with the convenience of a multi-dose system creates an ideal solution for patients. We are extremely pleased to be partnering with Shanghai HaoHai in this launch!" said Denise Johnston, Vice President Global sales at Nemera.

"We are proud to launch the Novelia® system in China, a significant advancement in managing contact lens discomfort from a clinical standpoint. This innovative delivery system directly addresses a key challenge in ocular health: providing sterile, preservative-free formulations in a convenient, multi-dose format. By eliminating preservatives, we mitigate the risk of ocular surface toxicity, allergic reactions, and therefore epithelial damage. This is critical for patients needing lubricating drops long-term. Our partnership with Nemera is founded on this shared commitment to patient-care." added Dr. Yang Qiang, MD PhD, Vice President of the Vision Care Division at Haohai Ophthalmology.

At Nemera, we partner with pharmaceutical companies to design and manufacture drug delivery devices that maximize therapeutic outcomes. We turn complex challenges into safe, efficient, and effective treatments for patients.

About Contact Lens associated Discomfort:

Contact lens-related discomfort is a common challenge for wearers, where the lenses can disrupt the natural tear film and increase tear evaporation rate. This often leads to sensations of dryness, irritation, and fatigue during or after lens wear. Contributing factors can include insufficient lubrication between the lens and the ocular surface, predisposition to dry eye, an ill-fitting lens or an unstable tear film exacerbated by the lens material.

About HaoHai

Shanghai HaoHai Biological Technology Co., Ltd., founded in 2007, is a leading Chinese biomedical enterprise focused on the four high-growth sectors of ophthalmology, medical aesthetics, orthopaedics, and wound care. Particularly in ophthalmology, HaoHai is a top producer and developer of intraocular lenses (IOLs) in China, lens raw materials, and surgical viscoelastic agents. HaoHai continuously investing in R&D of next generation vision care technology. To build this portfolio, HaoHai fully acquired its long-standing partner, Shanghai Qisheng Bio, a specialist in absorbable biomaterials. founded in 1992, Qisheng is a pioneer in absorbable biomaterials and now serves as HaoHai's wholly owned core subsidiary and

manufacturing platform for biocompatible materials across all key medical sectors. HaoHai Qisheng remains a top producers of sodium hyaluronate, medical chitosan, collagen, and viscoelastic agents in China.

HaoHai Qisheng factory in SongJiang district, Shanghai, PRC

About Nemera

As a world-leading drug delivery device solutions provider, our purpose of putting patients first enables us to design and manufacture devices that maximize treatment efficacy.

We are a holistic partner and help our customers succeed in the sprint to market of their combination products. From early device strategy to state-of-the-art manufacturing, we're committed to the highest quality standards.

Agile and open-minded, we work with our customers as colleagues. Together, we go the extra mile to fulfil our mission. To know more, visit: www.nemera.net
