

Parenteral

COMPLEX DEVICES,
SIMPLE CARE

**State-of-the art
parenteral device
platforms to improve
overall user's
injection experience.**

SELF-ADMINISTRATION

The growing prevalence of chronic diseases, coupled with the evolution of patient's lifestyles, is driving new ways of administering parenteral drugs.

- Home-care therapy setting is clearly emerging as one of the major trend in the industry, reinforced by the switch from intravenous to subcutaneous injections.
- Self-administration at home therefore translates into a need for safer, easy-to-use, and ergonomic devices.
- Parenteral drug delivery devices are adapted in multiple ways to leverage the user's injection experience hence foster patient adherence.
- The rapid expansion of biologics is accelerating the need for innovative drug delivery solutions that simplify treatment and support patient adherence.

PLATFORM APPROACH

Our platforms are designed strategically for a maximum possible range of potential therapeutic areas and patient populations.

- To meet both pharmaceutical company's and patients' needs, our platforms can be tailored and customized for your specific combination-product.

Our parenteral products

Passive safety systems

Our premium passive safety device platform, Safe'n'Sound®, helps in preventing needlestick injuries and leveraging patients' injection experience.

- Safe'n'Sound® 1ml
- Safe'n'Sound® 2.25ml
- Safe'n'Sound® 5.5ml

Wearables

Our smart on-body injector platform, Symbioze®, is tailored for reusable and large volume administration to foster patient adherence. It consists of a reusable main unit and a prefilled, preloaded disposable unit containing the drug.

Pen Platforms

Our comprehensive portfolio of pen injectors help customers to treat a wide range of pathologies.

- Reusable or disposable
- Manual or spring-assisted
- Variable or fixed dose

Implanters

We developed a portfolio of devices to deliver implants with integrated needlestick protection. We can also support your projects and explore design attributes for new developments.

A unique partner

Proven track record of more than 2 decades with industrial capacity worldwide

Thorough development lifecycle from patient journey research, feasibility & usability testing to manufacturability evaluation

Broad expertise to support pharma partners in their journey to combination product

Safe'n'Sound®

Ensuring a safer injection process,
while improving patient experience

One platform for every volume need

Benefits

- Enhance the patient injection experience
- De-risk development with a proven platform
- Cost-efficient solution

Key features

- **Safe injection:** Automatic needle protection
- **Empowered self-injection:** patient-controlled injection pace
- **Comfortable handling:** User-friendly design
- **Smooth injection:** Low activation force
- **Optimized drug delivery:** Low residual volume
- **Confident dose delivery:** Automatic needle retraction

Safe'n'Sound is a registered trademark of Nemera La Verpillière.

Safe'n'Sound® 5.5ml: Setting the standard in large volume safety system

- Designed for large-volume delivery
- Adapted to high viscosities formulations
- Proven platform approach

1st fully compatible large-volume syringe & safety device platform

- Compatible with SCHOTT Pharma's syriQ BioPure® 5.5 mL prefillable glass syringe
- Primary container and device engineered for compatibility, to reduce development risk
- Accelerated path to market for large-volume subcutaneous therapies

SCHOTT
P H A R M A

Proven usability for large-volume self-injection

- Human factors study conducted in the USA (July 2026) with 30 participants, including users with hand weakness and dexterity limitations
- 100% successful injections across all participants (90% rated one-handed administration at a 45° angle as easy)
- Mean injection time under 30 seconds

Safe'n'Sound® customization capabilities³

Safe'n'Sound® is a highly customizable platform to meet both users and pharma needs.

Pen injectors platforms

Designed for various therapies and applications.

Nemera offers 5 multi-dose pen platforms compatible with any drug in a cartridge container, designed to meet key user needs.

SIDE ACTIVATION

PENDURA™ AD

REUSABLE

Spring-assisted drug delivery
Low force & constant injection

PENONE™

FIXED DOSE

Spring-assisted drug delivery
Dose counter

PUSH-BUTTON ACTIVATION

PENVARIO™

VARIABLE DOSE

Manual drug delivery
Versatile platform

PENDIA™

VARIABLE DOSE

Spring-assisted drug delivery
Suitable for GLP-1, insulin & novel drugs

PENSET™

FIXED DOSE

Spring-assisted drug delivery
Suitable for novel drugs

PENDURA™ AD

Durable because reusable

This reusable pen platform can accommodate, systemic hormones and any other drug. It enables a smooth injection with low force required and constant injection speed.

Ergonomic release button and clear indication at the end of injection provide a comfortable patients' experience.

PENONE™

One fixed dose tailored to treatment regimen

This fixed dose pen platform is suitable for drugs not requiring variable dose, especially PTH and teriparatide.

It enables a smooth injection with low force required and no priming step of use.

Easy handling and dose counter to track drug intakes provide a comfortable patients' experience.

PENVARIO™

Manual drug delivery and variable dose

This variable dose pen platform can accommodate insulins, GLP-1, systemic hormones and any other drug.

It enables a reliable injection with low force required.

High capabilities of customization enable this platform to be very versatile.

Scale marking on the cartridge holder adjusted to drug & therapy

Therapy-specific customization

Any drug in 1.5 or 3 ml cartridge

Min and Max dose customization

Tirzepatide
15 mg variant

Semaglutide
2 mg variant

PENDIA™

Spring-assisted drug delivery, variable dose with dial back

This spring-assisted pen platform can accommodate insulins, GLP-1 RAs and any other drug. It enables a smooth injection with low force required and constant injection speed.

Ergonomic look & feel design provides a comfortable patient experience.

PENSET™

Spring-assisted drug delivery with set dose

This spring-assisted pen platform delivers a pre-set dose of drug.

The injection experience is very similar to an autoinjector one.

Use of predominantly soft surfaces creates a harmonious and calming visual experience.

Symbioze®

Large volume and sustainable on-body injector platform to foster patient's adherence.

Nemera's smart patch-worn on-body injector platform, Symbioze®, is an innovative, user-friendly and sustainable solution to self-inject a medication at home. Its unique positioning consists of delivering large volume drugs (20ml), especially biologics, in combination with a multiple-use approach, thanks to its reusable and disposable parts.

READY TO USE
'clip, patch & go'
patch worn,
prefilled and
preloaded

REUSABLE
Flexible for drug
adjustment or
multiple injections

SMART
Embedded and BT
connectivity

PHARMA FRIENDLY
Compatible with
Standard filling
and assembly

FLEXIBLE
Adjustable to
different
volumes, flowrates
& viscosities

KEY BENEFITS

Flexible for drug types, volumes, viscosities and selected PDC

Ready-to-use for patients with reduced number of easy steps

Cost effective thanks to amortization of the reusable part

**Connectivity feature
to enhance patients' adherence to treatment and
to preserve the connection with the team of
healthcare professionals**

Leveraging Insight by Nemera capabilities for developing mobile or embedded graphical user interface for a device or accessory: expertise in patient journey and UI/UX development

** Symbioze® is a trademark of Nemera La Verpillière*

Implanters

**Solutions for
sustained
released
formulations.**

Implants are fragile and insertion into the body requires caution. Nemera developed a portfolio of devices to deliver implants with integrated needlestick protection. As implants can vary a lot, we support your projects and explore design attributes that will increase the user experience such as improved holding and priming, improved motion for implant insertion, etc.

SOLID IMPLANT DEPOT INJECTION DEVICE

- Implants easily loaded under the skin without risk of breakage
- Visible implant before application
- Prevent device reuse thanks to its clip mechanism
- Robust and simple system
- Customizable implant (needle size, shape...)
- Safety depot syringe with compact plunger rod

SAFETY RETRO INJECTOR FOR SOFT IMPLANTS

- Implants easily loaded under the skin without risk of breakage
- Prevent device reuse thanks to its clip mechanism
- Little effort and pressure applied on implant
- Automatic implant positioning thanks to its specific plunger rod
- Better control of implant positioning

Our integrated combination product services

ANALYTICAL SERVICES & DESIGN VERIFICATION

Our team of experts is dedicated to ensuring the safety, efficacy, and compliance of your combination product including:

- Comprehensive analytical services and design verification
- Advanced testing methods tailored to your formulation and active ingredients
- Testing method development, administration, and reporting
- Performance and integrity verification of your device and drug product
- Adherence to global standards throughout the process

HUMAN FACTORS & USER EXPERIENCE MANAGEMENT

We provide exceptional support for combination products across diverse regulatory pathways, device types, and patient populations for global markets including:

- Human Factors program strategy and risk management
- Formative/summative testing (design validation) administration
- Human Factors Engineering documentation for regulatory submissions
- Enhances safety, usability, and overall satisfaction of your combination product.
- Aligns with FDA Human Factors Engineering guidelines and ISO 62366 standards
- Extends beyond the device to include instructions for use, packaging, and training programs to optimize user adherence and engagement

REGULATORY STRATEGY & SUBMISSION AUTHORIZING

We provide tailored strategies and support for all stages of the regulatory process, including:

- Development of a comprehensive regulatory strategy including pre-market to post-market support
- Guidance on FDA regulations and international standards (ISO 14971, ISO 10993)
- Expert support in regional regulatory guidelines
- Assistance in authoring and compiling regulatory submissions, including: Premarket Approval (PMA), 510(k) submissions, CE marking documentation, and Notified body opinion support
- Accelerated submission processes, drawing from, our experience in over 54 markets

Our Parenteral featured services

DEVICE VERIFICATION TESTING

Comprehensive tests range to ensure compliant and reliable drug-device combination, leveraging know-how on standard deliverables including robustness study, device performances, pre-conditioning.

COMPATIBILITY STUDIES WITH SPECIFIC PRELIMINARY DRUG CONTAINERS

Diversified activities to evaluate the compatibility between device platform and specific selected primary drug containers, to ensure combination product performances and regulatory dossier filing.

BIOLOGICAL RISK ASSESSMENT

Complete set of tests and evaluation to prove the biocompatibility of specific drug/device development process for regulatory dossier filing.
